In my Master of Relationship program I teach the following:

1. One of the major causes of divorce is a lack of understanding of your partner's needs. I teach you the basic differences between the genders. His needs and Her needs, as men and women are uniquely different. You will learn how to meet your partner's needs, not based on what you think, but based on what he/ she wants

2. What sex got to do with it? Many people have a difficulty having open and candid conversation regarding sex. But how can you talk about a subject when you don't know what to talk about. How can you make decisions when you don't know the options? We teach you what you need to know about sex. We also answer your questions.

3. You will be alerted to the grievous wrongs which so often embitter married life and how to safeguard yourself against them.

4. You will be taught the scientific reasons why many young people make decisions with the emotion (The Amygdala) rather than with the intellect (The Neocortex)

5. We'll discuss Finances. How much should you spend without your spouse's permission?

A wrong management of finance is a major cause of breakup in relationships

6. How to spot an abuser on your first date? A discussion of this subject is extremely important. You may be dating an abuser and don't know it. Get the facts.

7. How to curb the urge. The lie of casual sex. Finding healing after sexual promiscuity, rape and molestation.

9. How to deal with difficult in-laws.

10. Do the litmus test. Are you unequally yoked?

This program is a MUST for all singles, youth,  
parents, teachers and coaches.

If you intend to eventually marry, you need  
knowledge, as ignorance is too costly
